TENTH ANNUAL CATALOG

Landscape Designers

STRAWBERRY ACRES—Wyoming Park
Grand Rapids, Michigan
R. R. No. 8

It's not a Home-

until it's PLANTED

THE soft, rich beauty of growing trees, shrubs, plants, vines and flowers are necessary, before a "house" is really a home. And the grounds that are poorly or only half planted, only emphasizes the ugly bareness.

Plan Now to Plant this Spring

Make your grounds a beauty spot this summer. You can do it if you will plan now and be ready to plant this spring. Let us help you. We'll tell you which varieties will give you the effect you want and how to plant and care for them.

The Arthur L. Watson Nurseries

The

Arthur L. Watson

Nurseries

STRAWBERRY ACRES Wyoming Park

9

THIS catalog commemorates the tenth anniversary of The Arthur L. Watson Nurseries. Starting in a small way ten years ago this organization has grown until today it covers over sixty acres with more than a million trees, plants and shrubs under cultivation. This growth, we believe, is the best recommendation we can furnish as to the quality of our stock and the character of our service.

STOP

Paying High
Prices

You can now buy Watson's Hardy
Northern Grown
Trees and Plants at a Reduction of 30 to 50%

We have decided to pass on to you commissions we have previously paid to agents. This means a big saving to you. It means that you can buy the finest stock for less money than ever before. Some of our stock is even being sold at cost of production to reduce our stock.

VISIT THE WATSON NURSERIES

To get to the Watson Nurseries drive west on Burton Street until you come to the Byron Center Road, then turn left only a few blocks to "Strawberry Acres," on the right hand side of the road — that's the place. It's just a short, pleasant drive. Come out any time.

WATSON'S FREE LANDSCAPE SERVICE

We have a landscape department that will help you select and arrange the proper material to create real beauty and harmony — and the service is free. Fifteen years of experience in studying the habits and growth of different plants, trees and shrubs have given us a knowledge that we will be glad to apply to your problems. Just write us or telephone us (call 602 and ask for 627) and we will have a representative call at your convenience. No charge or obligation.

Ornamental and Shade Trees

Growing trees will add much to the beauty and comfort of a home. By eliminating superfluous varieties we offer herein a well rounded collection of kinds especially adapted to Michigan. Our trees are well spaced in the nursery and develop an abundance of fibrous roots.

Birch, European White (Betula alba)-Very desirable for lawn planting because

of the distinctiveness of its white bark. 3 to 4 ft	2.20
Birch, Cut-leaf Weeping (Betula alba laciniata)—A tall tree with graceful	2.20
pendulus branches and deeply cut foliage. The bark is white, A superb	
lawn tree and one universally admired.	
5 to 6 ft 4.00 6 to 7 ft	5.00
Catalpa, Speciosa (Western Catalpa)—A medium sized tree of great hardiness.	
Leaves large and dark green. Flowers in May or June borne in large	
clusters, white with yellow and purple spots. Is fast growing and makes dense shade. 8 to 10 ft	1.50
Catalpa, Bungei (Umbrella Catalpa)—Grafted high on a straight upright stem,	1.00
it makes an umbrella-shaped top without pruning and the large deep green	
leaves lie like shingles on a roof. Fine for the ornamentation of lawns,	
parks, cemeteries, etc.	
1 yr. head	4 00
2 yr. head	7.50
Devil's Walking Stick (Aralia Spinosa)—A small tree with stout prickly stems	1 00
and compound leaves. 3 to 4 ft	1.00
Elm, American (Uumus Americana)—One of the best street trees on all but the driest soil.	
1½ to 1½ in. diam 2.00 1¾ to 2 in. diam	4.00
$1\frac{1}{2}$ to $1\frac{3}{4}$ in. diam	5.00
Elm, Chinese (ulmus Pummilla)-New fast growing elm. 5 to 6 ft	3.00
Flowering Dogwood (Cornus Florida)-The large white flowers appear before the	
leaves are out, making one huge bouquet. 3 to 4 ft	3.00
Flowering Crab, Bechtels (Malus ioensis bechteli)-Flowers are profuse, double	
pink, fragrant in June, on a small tree. 3 to 4 ft	2.00
Flowering Crab, Hopa (Malus ionsis hopa)-One of Hanson's new varieties with	
small scarlet fruit. 4 to 5 ft.	3.00
Maple, Norway (Acer platanoides)—A low headed tree giving dense shade. It is	
long lived and one of the best. 5 to 6 ft	7.50
6 to 8 ft. 2.50 2 to $2\frac{1}{2}$ in. stem.	10.00
8 to 10 ft	15.00
10 to 12 ft 5.00	
Maple, Schwedleri (Acer platanoides schwedleri)-Of the same fine growth and	
habit as the Norway except that the leaves come out bright crimson and	
gradually change to dark green during the summer. 6 to 8 ft	6.00
Maple, Silver (Acer dasycarpum)—Of quicker growth than most trees and valu-	0100
able where immediate shade is desired. Forms a large spreading head and	
leaves are silvery underneath.	
6 to 8 ft	5.00
$\begin{array}{cccccccccccccccccccccccccccccccccccc$	
$1\frac{1}{2}$ to 2 in, stems 3.00 4 to 5 in. stems	
Maple, Wiers Cut-leaf (Acer saccharinum wieri)—A very beautiful specimen	
tree with finely cut foliage and a distinct drooping habit, the pendulous	
branches often coming to the ground. 6 to 8 ft	2.50
Ash, Mountain (Sorbus aucuparia)—Noted for large clusters of red berries.	
5 to 6 ft	4.00
Mulberry, Tea's Weeping (Morus alba pendula)—The most graceful and hardy	
of all weeping trees. Forms a perfect umbrella shaped head with slender willowy branches drooping to the ground. Admirably adapted to small or	
large grounds. 5 to 6 ft	4.00
Plum, Flowering (Prunus triloba)—Tree dwarf, branches in early spring covered	
with bloom.	
3 to 4 ft	2.50
Plum, Purple-leaf (Prunus pissardii)—A hardy decorative small tree with purple	
foliage, which color is retained throughout the summer. Pink flowers are	1.75
borne in great profusion in spring as the leaves unfold. 3 to 4 ft	1.75

7.50

Plum, Purple-leaf (Prunus Newport)—Similar to Prunus Pissardi but richer colored, maturing to still red tinge in the deep bronze-purple. 3 to 4 ft	2.00
Poplar Simoni (Populus Simoni)—Of only medium height, although bushy and rapid growing.	
8 to 10 ft 2.00 10 to 12 ft	3.00
Poplar, Lombardy (Populus nigra italica)—A tall columnar tree with its towering spire has an individuality of its own. Useful for tall screens and backgrounds.	
5 to 6 ft	2.00
6 to 8 ft	3 00
Poplar, Bolleana (Populus bolleana)—A tall narrow-topped tree shaped like the Lombard Poplar but is much more graceful and attractive in appearance. 6 to 8 ft	3.00
Red Bud (Cercis canadensis)—A native woodand beauty that gives such cheerfulness in spring with its pink pea-shaped flowers, appearing before the leaves. 4 to 5 ft. Each	1.50
Paul's Double Scarlet Thorn (Crategus oxycantha splendens)—The most beautiful of the double flowering Thorns. The flowers are bright scarlet, large full and very double. Makes a splendid specimen for the lawn. Each	3.00
Tulip-tree (Liriodendron tulipifera)—A grand tree of tall pyramidal habit, with broad glossy leaves turning yellow in autumn. The flowers, appearing in May or June are tulip-like in shape and size. 5 to 6 ft. Each	2.00
Willow, Pussy (see shrubs)	
Willow, Wisconsin Weeping (Salix blanda)—A large tree with slender pendulous branches. Is very hardy and will endure the winters of the far north, 8 to 10 ft	2,50

Evergreens

Recent years have witnessed a tremendous increase in the popularity of evergreen plantings. In the winter and summer they add a note of dignity and charm to the home grounds, softening a harsh line here and lending a touch of grace there, to an otherwise monotonous shrub planting. In screen plantings they are unexcelled since they retain their foliage throughout the year.

The Arborvitaes

THE THEOLY	tacs

Vines	
The following are the hardiest and most satisfactory vines Michigan conditions:	for
American Ivy (Ampelopsis quinquefolia)—A high climbing vine clinging to walls and trunks of trees. The compound leaves consist of fine bright green leaflets, turning to a rich red and scarlet in Autumn. Each	.75
as it clings firmly to the smoothest surface, the overlapping leaves forming a perfect mass of foliage. In summer the color is a deep green changing to crimson and yellow in autumn. Each	.75
of beautiful orange crimson fruits that are retained all winter. These sprays of berries are much valued for house decoration in winter. Each	.75
Bittersweet (Celastrus scandens)—Handsome glossy foliage and large clusters of beautiful orange crimson fruits that are retained all winter. These sprays of berries are much valued for house decoration in winter. Each Clematis, Jackmanii (Purple)—Has large, intense, violet flowers in July. One of the most popular varieties. Each Clematis, Paniculata (White)—A rampant grower giving abundant shade. In August it is actually covered with small star-like white sweet-scented flowers.	1.00
August it is actually covered with small star-like white sweet-scented flowers. Is clean and will not litter up the ground or porch. Each	.75
growth, with large heart shaped leaves and brownish flowers resembling a miniature pipe. As it forms a dense shade it is splendid for archways or verandas. Each	1.00
or verandas. Each. Honeysuckle, Hall's Japan (Lonicera japonica Halliana)—A strong grower, has dark green leaves that are retained throughout the winter and very fragrant white flowers changing to yellow borne in great profusion in June and occasionally until frost. Excellent for trellises and ground cover. Each Trumpet Vine (Bigonia radicans)—A high climbing vine with large trumpet shaped searlet flowers in July. Each	.75
Trumpet Vine (Bigonia radicans)—A high climbing vine with large trumpet shaped scarlet flowers in July. Each.	,60
Wisteria, Chinese Purple—A rapid growing vine with good foliage. The pale- blue pea-shaped flowers are profusely borne in May in dense drooping clusters from 7 to 12 inches long. Very showy and exceptionally good for arbors and pergolas. Each	.60
pergottes. Lacti	

Perennials

We offer a well selected list of perennials, the result of years of experience, comprising the best varieties from the standpoint of hardiness, range of color, and aptitude to local conditions. Since our plants are grown under a sprinkler system, combined with abundant fertility, we are assured of a plentiful supply of vigorous perennials in abundant variety.

PRICES OF PERENNIALS-(Except Where Noted)

25c Each — 5 for \$1.00 — \$2.00 per Dozen

Achillae, Millefolium roseum-18 in. July to October. Rosy pink flowers in dense heads

Achillae, Perry's White—1 to 2 ft, June to September. Pure white flowers one inch across; broad overlapping petals. Very choice for cutting.

Achillae, The Pearl—1 ft. Pure white double flowers all summer. Good for cutting.

Anchusa. Dropmore—4 ft. Tallspikes of beautiful blue flowers all summer. Rough broad foliage. For producing a mass effect of brilliant blue this cannot be surpressed. passed.

Anemone, Hupehensis-1 ft. Large flowers of mauve-rose 11/2 in. across, produced abundantly from August until late fall.

Alyssum (Rock Madwort) Saxatile compactum-1 ft. Broad masses of bright yellow

flowers in early spring. An excellent plant for the rockery or front of borders.

Aquilegia (Columbine)—1 to 2 ft. Flowers come in blues, white and yellow. Blooming period covers late spring and early summer months. A good old-fashioned

Asters, Hardy Mixed-3 to 5 ft. White, pink, red and blue, blooming in late summer and fall.

Canterbury Bells-(Campanula Calycanthemo) -2 ft. Cup and saucer varieties.

White, pink and blue, semi-double. Cerastium Tomentosum (Snow-in-summer)—Low growing having silvery white foliage and abundance of snow-white flowers.

Chrysanthemum, Hardy-The old fashion kind that should be in every garden. Pink,

red, white, yellow and bronze.

Coreopsis Grandiflora—Double flowering. 2 ft. June to September. A solid mass of golden yellow flowers borne on long stems. Fine for cutting.

Daisy, Giant-Large flowers with snow-white retals and deep yellow center, blooming all summer.

Delphinum-(Perennial Larkspur)-3 to 5 ft. All sizes.

Belladonna-Sky Blue. Bellamosum—Dark Blue

Chinese-White or Sky Blue.

De Luxe Hybrids-Lavender to Blue.

De Luxe Hybrids—Lavender to Blue.

The Hybids vary from Lavender to Dark Blue, single and double mixed.

Dianthus, Mixed (Hardy Pinks)—1 ft. Perfectly hardy and flowers continuously from spring until fall. Clove scented and suitable for cutting.

Dicentra, Spectabilis. (Bleeding Heart)—The old fashioned favorite. Its long racemes of heart-shaped pink flowers are always attractive. Each, 75c.

Digtalis, Mixed (Foxglove)—3 to 6 ft. A favorite everywhere. Its stately and picturesque beauty cannot be surpassed.

Funkia Subcordata grandidate (Plantin Lity) 2 ft.—Vovy loves pure your white lib. Funkia, Subcordata grandiflora (Plantain Lily) 2 ft.—Very large pure white lily-

shaped fragrant flowers in August and September. Their broad shiny foliage makes them doubly attractive. Does well in shade.

Gaillardia, 2 ft.—The most desirable of the hardy plants. June to September. Dense tufts of drooping leaves producing gorgeous crimson and gold blooms. Geum, Mrs. Bradshaw—18 in. A splendid new variety, with large double flowers of fiery red, blooming nearly all summer.

Gypsophylla, Paniculata compacta, (Baby's Breath)—2 to 3 ft. Forms a symmetrical mass of tiny white flowers having a beautiful gauze-like appearance.

Helianthus (Hardy Sun Flower)—4 to 6 ft. Where planted in masses against a back ground of shrubbery they produce a grand effect. Large yellow flowers 4 to 5 in. across are produced in great profusion in late summer.

Hibiscus, Mallow Marvels—4 to 5 ft. A robust plant with good heavy foliage and producing an abundance of flowers of enormous size 6 to 10 inches in diameter. In rich shades of crimson, pink and white. Excellent for the shrub border.

Hollyhocks—4 to 6 ft. The old garden favorite with which every one is familiar, forming perfect rosettes of the most delicate shades of color. Double pink, red, white, yellow and maroon. And single mixed.

See Special Perennial Offer on Back Cover

Iberis 8-10 in .- A desirable dwarf plant with evergreen foliage which is completely hidden with dense heads of flowers in the spring.

Lathyrus Latifolius (Hardy Sweet Pea)—Not widely known in this country but great favorites in England. They are a climbing plant and are excellent for trellises. We have them in pink, red and white.

Linum perenne (Perennial flax)—2 ft. Very attractive both in foliage and bloom.

Flowers beautiful pale blue on slender graceful stems.

Lupinus—These plants produce long spikes of pea-shaped flowers a foot long on stems three feet high. We have them in blue, white and rose.

Lythrum superbum roseum—A splendid plant for the wild garden or for banks of

Lythrum superbum roseum—A splendid plant for the wild garden or for banks of streams, ponds, etc.

Physalis, Francheti. (Chinese Lantern Plant)—An ornamental variety of the Winter Cherry, forming dense bushes about 2 ft. high, producing freely its bright orange-scarlet lantern-like fruits; which, when cut, will last all winter.

Physostegia, Virginica, Vivid (False Dragonhead)—3 to 4 ft. Bears long spikes of deep pink in August. Lasts for a long time after cutting, double golden yellow flowers in late summer.

Platycoden. Grandiflora. (Balloon Flower)—18 inch June to October. Large Balloon

shaped flowers all summer.

Poppy, Oriental—3 tt. Large scarlet cup-shape blooms with purplish-black blotches at the base of the peals. May and June.

Rudfeckia (Golden Glow)—6 ft. Very popular, producing masses of large yellow

flowers.

Statice latifolia 1 ft.—Fine for border. Branching sprays of bloom of a purple blue color. These, if cut and dried, will last for months. color. Stokesia 1½-2 tt.—A very desirable plant bearing very freely large lavender-blue flowers often measuring four and five inches in diameter. Desirable as a single

plant and effective in masses or beds.

Sedum

The dwarf varieties of Sedum are charming plants for sunny positions in the rockery, etc., and the taller kinds make effective color groups in the border. They thrive in almost any soil. They are especially fond of sand and full sun. We offer the following varieties:

Each..... 5 for.....\$ 1.00 12 for..... 2.00 Sedum, Acre (Golden Moss)-Very dwarf. Much used for covering graves, foliage green, flowers bright yellow.

Sedum kamtchaticum 3 in.—Flowers star-shaped, orange yellow, borne in terminal clusters in July and August. Foliage turns golden yellow in autumn.
Sedum album 3 in.—Foliage green. Small white flowers.

Sedum obtusatum 3 in.—Foliage bright green.
Sedum, Sexangulare—Very dwarf. Dark green foliage, yellow flowers.
Sedum spumium occineum 6 in.—A beautiful rosy crimson-flowered form. July and August.

Sedum, Spectabile "Brilliant"—18 in. Erect growing and has broad light green foliage and immense heads of bright amaranth-red flowers in September.

Lilies

(Hardy Garden Varieties)

Prices of all varieties are 50c each except where noted otherwise.

Auratum (Gold Banded Japan Lily)—3 to 5 ft, July to September. Large fragrant flowers are of a delicate ivory-white color, thickly studded with chocolate crimson spots and striped through the center a golden yellow.

Album—Large pure white.

Candidum (Madonna Lily)-The old fashioned garden variety and one of the most beautiful. (For sale in September only.)

Double Tiger-Orange color with black spots.

Hemerocallis, Flava (Yellow Day Lily)—2½ ft. Sweet scented, clear, full yelow flowers in June.

Hemerocallis, Fulva. (Brown Day Lily)—3 ft. Coppery orange, shaded crimson July.

Hemerocallis, Dr. Regel—1½ ft. handsome rich orange-yellow flowers in May. Fine

for cutting.

Krameri—2 to 4 ft. The funnel shaped flowers are 6 inches or more in length and

Solfatare—Midsummer. Guard petals snow-white, center sulphur-yellow changing to pure white. Each	.90

Grasses, Hardy Ornamental

The ornamental Grasses can be used with telling effect in borders, large beds, or by the margin of ponds and lakes. They are often used with small shrubs and medium sized trees in wide borders. The Eulalias planted singly on lawns where the soil is deep and rich, take care of themselves and grow very rapidly into large specimens.

Erianthus ravennae (Plume Grass or Hardy Pampas)—10 to 12 feet high, frequently throwing up 30 to 50 flower spikes. Closely resembles Pampas Grass

Phalaris arundinacea variegata (Variegated Ribbon Grass)—Leaves longitudinally striped with white; very ornamental; sometimes run wild about old places. 18 inches.......

Roses

Rose beds should be prepared with considerable care in order to insure a continuous supply of flowers throughout the season. It is advisable to prepare the soil in the beds to a depth of at least two feet. Careful provision should be taken to see that the water does not stand on the beds since roses require good drainage. The bushes should be trimmed and planted so the bud union is two inches below the surface of the ground. Cultivation in the summer and protection of the plants in the winter by hilling the dirt about them besides covering them with litter will go far in improving the quality of bloom and vigor of the bushes.

Lawn Seed

In preparing a lawn, after grading is completed, the soil should be thoroughly raked in order to reduce it to as fine a condition as possible, as well as to level it. Sow the seed in the spring or in August or first part of September, using one pound of Watson's Special Mixed Lawn Seed to from 200 to 300 sq. ft., according to the relative fertility of the soil, light sandy soils requiring more seed than the heavier soils. After sowing the seed it should be raked lightly, then thoroughly rolled. If seeding should be late in the spring, no pains should be spared to give it plenty of water, a thorough soaking every day will not be too much.

Watson's Special Mixed Lawn Seed-A mixture of fine dwarf, close growing	
grasses, including white cover, that will produce a neat velvety lawn and	
permanent sod in a short time. Per lb	.50

Our Guarantee

All goods are guaranteed to reach you in good condition; mistakes, if made, will be promptly rectified. Accept shipment, examine and count on receipt and notify us at once should there be any errors, and the carrier as well, if any damaged stock. This guarantee not good unless above requirements are complied with. We do not guarantee continued growth.

Remember, a tree, shrub or plant is a living organism, as much as a cow, horse or man. It breathes, drinks and feeds, and is liable to attacks of disease and insects. At prices we sell, it is impossible for us to guarantee growth or to be responsible for stock after delivery to our customers in good condition.

NON-WARRANTY

While we hold ourselves in readiness, on proper proof, to replace free of charge all trees, etc., that may prove untrue to label, or refund the amount paid, we give no warranty expressed or implied as to description, quality, productiveness or any other matter of any nursery stock, seeds, bulbs or plants we sell.

(Signed) The Arthur L. Watson Nurseries.

SUBSTITUTION

We reserve the right in case we are out of a variety, to substitute another of equal merit when it can be done (always labeling with correct name), unless the party ordering says "No Substituting," in which case we will fill order as completely as we can, and refund balance of remittance.

ORDERS LESS THAN \$1

We cannot afford to fill orders of less amount than one dollar, unless, in addition to amount for plants wanted, ten cents is sent.
